

# Company Presentation

# About Us

Tresor Capital LTD is an independent investment company, established in 2018 that united experienced professionals from several British and foreign venture capital funds.

The secret to the success of the venture financing is that one successful investment can bring no less and often more income than the rest of the investments in the aggregate. We invest assets in projects at the initial stage of their creation. To do this, we have created a wide network of “scouts” who are looking for promising innovative enterprises and startups.

**In 2019, we created an online platform to unite private investors and businessmen, to help investors to get a stable passive income and finance businessmen’s ideas.**

**REGISTERED UK COMPANY**

Company number #11567503

**REFERRAL COMMISSION**

Earn from referral deposits

**6%-1%**

# Startups

At different stages of development the venture funds that were included in Tresor Capital have cooperated with innovative companies, the total market value of which is now more than 580 million US dollars.
